

Our environmental charter

Dear guests,

We are delighted to welcome you to the Hôtel Parc Beaumont.

We are committed to protecting the environment. For us, for your and for future generations, we do everything we can to minimise the impact of our activity on the environment.

We are Green Key certified.

The Green Key label recognises tourist accommodation and restaurants that are committed to a voluntary, effective and dynamic environmental approach. This label is awarded annually by an independent jury made up of experts and professionals from the tourism and environmental sectors.

Thank you for supporting us in our efforts during your stay!

Clef Verte

We raise awareness among our teams and customers

- Our director, who is also the company's environmental manager, has completed specific training on the challenges of sustainable tourism, environmental preservation and CSR.
- All of our teams are also involved and aware of these issues. They know what actions to take in their daily tasks.
- We encourage our customers to adopt eco-friendly practices as well.
- We encourage travel by public transport and/or bicycle.
- We are equipped with charging stations for electric cars.
- We inform our customers about the various walking trails in the surrounding area.
- With strong local roots, we are delighted to help you discover our region and local partners: we share with you the activities and leisure opportunities available near our hotel.
- All our cleaning products are eco-labelled.

We save water

- We have installed water savers/pressure reducers on taps and showers. Our toilets are equipped with volumetric flushes.
- We check our water meters every month to better manage our consumption and have set up a table to track our consumption.
- We change sheets and towels on request.

We save energy

- We check our energy meters every month to better manage our consumption and have set up a table to track our consumption.
- We purify the air in our fitness room using a JVD purifier and we control the air quality in this room, a meeting room and a suite using Airthings sensors.
- We have been using the District Heating Network since 2022.
- Our rooms and meeting rooms are equipped with individual thermostats.
- We have sensors/timers to limit energy waste.
- We are replacing all light bulbs with LED or low-energy bulbs and have already equipped more than 85% of our lighting.
- Our establishment's windows are double-glazed.
- We have an in-house laundry facility and prioritise eco-friendly washing programmes.

We limit and sort waste

- We have installed several internal sorting points (recyclable/non-recyclable). Glass is disposed of in a special bin and food waste is collected separately by Veolia
- We work with mostly bulk or large-format products to limit unnecessary packaging (e.g. welcome products are in large formats)
- We have completely banned the use of plastic bottles. We offer our customers water in glass bottles or jugs filled with tap water.

We strive to offer you sustainable food.

- Thanks to our in-house restaurant, all our dishes are homemade and we choose local and organic producers for our ingredients as much as possible. We can adapt to any type of diet.
- We control our restocking to avoid food waste as much as possible. Each product or dish is transformed or reused to aim for zero food waste.
